

## The finest in commercial shading & protection

C&W Industries, LLC manufactures the finest and most versatile commercial shading products in the U.S. Customers such as Walmart, Lowe's, Home Depot, Tennessee

Farmers Coop, and Alabama Farmers Coop all agree that C&W's line of Garden Shade™ shading systems literally

pay for themselves. Garden Shade™ centers lower the cost of sun- and heat-damaged plants and other garden center products. Plus, Garden Shade™ centers are a snap to erect, take down, and store.

## Protective Shade & Heavy Duty Construction

C&W Industries' Garden Shade™ shading structure is versatile enough to accommodate almost any application. Plus, these structures are durable enough to withstand even the harshest of elements.

Garden Shade™ systems are available in 16'x16' sections and are expandable in any direction.

Adding to their versatility, the unique “No Tools Required”

erection design makes Garden Shade™ unrivaled in its field.

### Protective Shading

Garden Shade™ systems can increase profits in most retail garden centers by **reducing harmful sun exposure to live products by as much as 80%**. Retailers experience an increase in sales by maintaining healthier plants that are not subjected to heat damage.

In addition to protecting live plant products, Garden Shade™ systems **eliminate damage and fading of bagged goods**.

Finally, adequate protective shading has been shown to encourage greater shopping traffic. A Garden Shade™-protected outdoor environment is as much as **20 degrees cooler** than an unshaded retail venue.

Garden Shade™ is an investment that **pays for itself by lowering costs and increasing sales**.

### Heavy-Duty Construction

Garden Shade™ systems are constructed of 11 gauge and 14 gauge steel tubing. All steel components are protected from rust and corrosion with a power-coated, durable finish.

Even the shading cover itself is made of premium quality vinyl offering 80% shading of harmful direct sunlight.

Assembling or expanding the 16'x16' Garden Shade™ sections is very easy since **no tools are required**.
